Profile

I architect and lead the development of scalable, high-performance web applications. Specializing in conversational AI, gamification, and high-traffic platforms, I drive technical excellence, DX, and product impact.

Work Experience

02/2025	Senior Software Engineer SK Entertainment, Inc. - Architected and led the complete frontend redevelopment of an AI-driven chat platform, significantly enhancing performance, SEO, and UX - Spearheaded global state architecture migration from Context API to Zustand, eliminating render bottlenecks and improving maintainability - Established comprehensive frontend guidelines, documentation, and unit testing standards, elevating team output and code reliability - Modernized the tech stack by driving the adoption of updated React Router / Remix patterns - Implemented unit testing throughout the codebase to ensure higher reliability and long-term code quality
05/2024 – 02/2025	Senior Software Engineer CI&T - Developed the frontend for a high-traffic AI tool, ensuring seamless functionality for thousands of users using React and Zustand - Built and maintained core components for an internal Design System combining shadcn and Tailwind to improve UI consistency - Ensured continuous application stability by implementing complete Vitest and Playwright test suites - Delivered scalable applications using agile methodologies to hit project deadlines
12/2021 – 11/2023	Software Engineer CI&T - Developed the frontend of a corporate gamification app for HR, utilizing React to improve employee engagement - Optimized application responsiveness and performance leveraging Redux, TailwindCSS, and Azure - Maintained robust code coverage utilizing React Testing Library and Jest - Leveraged TypeScript to enforce strict typing and code maintainability - Developed features for a global rewards platform impacting 2M+ clients across 15+ countries using React and Next.js - Implemented complex internationalization (i18n) solutions to support cross-border operations - Refactored legacy Redux architecture into Redux Toolkit, significantly improving maintainability - Wrote comprehensive unit and E2E tests using React Testing Library and Cypress - Acted as a liaison between engineering and product teams while utilizing Gen AI tools to boost development efficiency

Work Experience

10/2021 – 12/2021

Software Engineer iFood

- Optimized critical user flows on a high-traffic e-commerce platform using Next.js and TypeScript
- Implemented a scalable Backend-For-Frontend (BFF) architecture using GraphQL, reducing data overhead and improving client load times
- Contributed to the iFood Shop tribe, enhancing platform features and user experience

06/2021 – 10/2021

Software Engineer Rbm Web - Sistemas Inteligentes

- Engineered complex financial market dashboards using React JS, Redux, React Bootstrap, and GitLab
- Modernized legacy applications with Redux Toolkit, Material UI, and Styled Components
- Championed test-driven development with React Testing Library and Cypress

07/2020 – 06/2021

Juiz de Fora, Minas Gerais,
Brasil

Board Game Developer Creative Game Studios

- Responsible for level design, playtesting, and game balancing
- Implemented QR code doors feature
- Helped set budgets and collaborated on the development of the game's website

03/2016 – 03/2019

Juiz de Fora, Minas Gerais,
Brasil

Board Game Developer Histeria Games

- Developed two successful board games launched via crowdfunding
- Balanced mechanics, conducted playtests, and designed kingdoms Presented at conventions and maintained the website

05/2014 – 07/2014

Juiz de Fora, Minas Gerais,
Brasil

Development Internship Life Gestão de Frota

I was an Intern in Life Equipamentos Eletrônicos and helped the migration of the platform from Delphi 4 to Delphi 7, I also give Client Suport
